PROFESSIONAL TECHNICIAN TOOL KITS

Starter Technician Kits, Trade Technician Kits and Master Technician Kits designed by SP Tools have been developed in conjunction with many car manufacturers. The requirements for the tools needed have been reverse engineered by listing all fasteners used in vehicle manufacture and incorporating the tools in the kits needed to service these vehicles. Most vehicle manufacturers use only metric components so the decision to design these kits as metric only was logical.

CONTACT AREA

MAXIMUM CONTACT

Spanner heads make contact on the flat sides of the fastener head, not the points.

QUAD DRIVE OPEN END

SP Tools patented **QUAD DRIVE** open end offers 4 times the gripping power of a standard ROE spanner by wrapping around the fastener and maximising the contact on the flat sides of the fastener head, not the points.
