- Extra-large viewing area (73×107mm) + peripheral SideWindows
- New Speedglas True-View for colour and contrast
- Aerodynamic exhaust vents remove exhaled air

Part no. 501826

## The Reclassification of Welding Fume as 'Carcinogenic to Humans'

In early 2017, welding fume was reclassified from IARC classification Group 2B (possibly carcinogenic to humans) to Group 1 (Carcinogenic to humans).

This change was primarily associated with the effects of UV exposure on the skin and eyes and also for lung cancers and limited evidence for kidney cancer from welding fume exposures.
