OMEGA ELASTOMERIC COUPLING

- Split-in-half flex element design for simplified assembly and disassembly.
- Interchangeable hubs allow for reduced inventory.
- High-misalignment capacity accommodates unavoidable misalignment with low reactionary forces.
- Torsionally soft flex element cushions shock loads and vibration, extending equipment life.
- Polyurethane flex element does not require lubrication.
- Polyurethane-to-metal bond eliminates assembly and slippage problems associated with mechanically clamped designs.
